

To Our Patients with Insurance,

Verification of insurance eligibility and/or authorized referral does not guarantee payment for services. All payments are subject to health plan provisions. This verification of eligibility and/or referral serves as a recommendation to the claims payer and does not determine the level of benefits paid on the claim nor the eligibility of the patient. The Verification Department and/or Utilization Management Department is not the claims payer and cannot guarantee payment of any claim. We make every effort to verify your insurance coverage but recommend that you personally check your benefits before proceeding with further treatment.

Payment of claims is subject to eligibility, contractual limitations and CMS correct coding guidelines. These guidelines are part of your insurance benefits and this office including the doctor and staff have no control of how the plan is implemented.
